

SKILLS

Programming Languages: C++, Python, Kotlin, SQL
Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, OpenCV, Keras, NumPy, Pandas
Databases: MySQL, SQLite, Firebase Realtime Database / Firestore
Tools & Platforms: Android Studio, Git, GitHub, Jupyter Notebook, Figma, Unity Hub
Mobile Development: Android Development, Jetpack Compose, XML Layouts, Material Design
Machine Learning: Model training, TFLite optimization, Data preprocessing, Feature engineering

TRAINING

- Competitive Programming |Cipher School**
- May 2024 – July 2024
- Completed intensive training in **Competitive Programming** with a strong focus on **Data Structures and Algorithms (DSA)** using efficient problem-solving techniques.
 - Developed strong proficiency in **Graph Algorithms** such as BFS, DFS, shortest paths (Dijkstra), minimum spanning trees, cycle detection, and graph representations.
 - Tech Stack:** C++, STL, Algorithms, Data Structures, Competitive Programming, Dynamic Programming, Graph Theory, Time & Space Complexity

PROJECTS

- MediBot | [GitHub](#)**
- Aug 2025-Dec 2025
- Developed an AI-driven medical chatbot capable of offering preliminary health advice by recognizing symptoms and mapping them to relevant medical information.
 - Designed context-aware NLP pipelines to handle variations in user queries, ensuring accurate and reliable health-related responses.
 - Tech Stack:** Dialog flow, Fast API, Flask, MongoDB, Hugging Face, Lang Chain
- EcoTrack– Footprint | [GitHub](#)**
- June 2025 – Oct 2025
- Built *EcoTrack*, a sustainability-focused Android app that calculates users’ carbon footprint based on their daily activities and provides personalized recommendations to reduce environmental impact.
 - Integrated ML model optimization, Firebase backend, and a modern UI/UX**, improving detection accuracy, app performance, and delivering a seamless user experience for eco-friendly waste management.
 - Tech Stack :** Kotlin, Android Studio, Jetpack Compose/XML, Firebase, TensorFlow Lite, Python (model training), REST APIs, SQLite/Room, Git & GitHub.
- Clean Vision | [GitHub](#)**
- Dec 2024- Feb 2025
- Developed an AI-powered waste classification system using Convolutional Neural Networks (CNNs) that achieved up to **97.2% accuracy** in distinguishing between organic and recyclable waste for smart waste management applications.
 - Built and evaluated multiple deep learning models including **EfficientNet-Bo, MobileNetV2, and ResNet50**, optimizing for both performance and on-device inference suitability
 - Tech Stack:** - EfficientNet-Bo, MobileNetV2, ResNet50, TensorFlow, Keras

CERTIFICATES

- Developing Front-End Apps with React | Coursera | [Certificate](#) Sep 2025
- Game development using C# in unity| Cipher Schools | [Certificate](#) July 2024

ACHIEVEMENTS

- Solved 500 Problems on Leet Code** Sept 2025
Achieved 1000+ points on Geeks for Geeks (GfG) with a university rank of 524.
- Secured seventh position in the “Code-a-Thon” competition.** Dec 2024
Participated and ranked 7th in the Hackathon.

EDUCATION

- Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.83 2022-2026
- Narayana junior College** VJY, AP
Intermediate; Percentage: 95% 2020-2022
- Bhashyam Schools** Guntur,Ap
Matriculation; Percentage: 98% 2019 – 2020
